the sanitary condition of Memphis without arriving at any conclusion. If they ever reach a sensible conclusion it will be a surprise to this end of the State.

AFTER spending a few days in fruitless efforts to convince Chancellor Lavingston that he ought to issue the injunction prayed for by the State board of health, the eminent counsel for the State Indea Archibald Wight AFTER spending a few days in fruitless counsel for the State, Judge Archibald Wright, immediately, wanting to know the color and hit upon the happy thought that his brother-sex of the patient, so that he could send the usel for the State, Judge Archibald Wright, in-law, Judge Eldridge, was the man to get a case before. So an arrangement was made by which, through interchange of courtesies Langstaff, of the Howards, and Dr. Winn, of with Chancellor M'Dowell, Judge Eldridge | the National board of health medical inspec could sit in judgment on the legality of Ecquire Galloway's election as special judge.

The State board, having failed to accomplish any good, is determined to exhaust all its resources in defense of that most ridiculous which a person died last season with yellowrule, No. b. When that article was incor- feyer, and sleeps on a feather-bed on which porate's in its regulations, the board assigned another person died last year with black womit, but which had never been exposed to be baled and sent off in the cotton. This nonsense was so generally ridicotton. This nonsense was so generally ridi-culed that the board's champion abandoned of safety, held at the Planters insurance that theory, and informed the world that the baled-germ fear had never existed, and that the real danger lay in the ingress and egress of the parties driving the seed-cotton wagons, S. But wagons with baled cotton, cotton-seed, garden products, wood, or almost anything else, were allowed to come and go. This showed the inconsistency, insincerity, and even imbecility of the State board-unless they had made arrangements to provide all drivers except the seed-cotton men with vehicles into which the sporads could not jump (provided they are jumpers), and with clothing so different from other people's that it would not carry out the infection. No one is simple enough to suppose any such arrangement had been made. Until the State board can show that fever germs have been carried in cotton bales, and that one man's clothes are not as liable as another's to carry the infection, it will stand before the world in an un-But a strong opposition had been raised, and the State board obtained the indorsement of Bran Sin-I have only awaited final action on the pay of colored troops to withdraw my consent as member of the committee on the National board. It is now so late in the season that there is not much fear of the disease spreading in the country, and the application just made for an injunction is no more defensible than most of the actions of the great State hum-

Sunday night, while at Miller's station taking water, he observed a large balloon directly over his head, which he judged to be less than a mile away, driving rapidly along in a northeasterly direction toward Lake Michigan, which is only a half mile from the station. John Rulla, his fireman, states that he also saw the balloon, and with Faber watched it out of sight. They told the operator at Forty-third street of the matter the same night. It was undoubtedly the Wise balloon.

PANAMA, September 25.—A dispatch from Ocanana, on the river Magdalena, received at Barranquilla on the seventh instant, reported a rising of communists of Bucaramaga, in the State of Santander, on the ninth instant. The alcalde, Pedro Collazas, headed a crowd of ruffians in an attack upon several wealthy establishments, among others the only bank in the place, and completely sacked them, killing and wounding the persons who endeavor-ed to defend them, and also burning build-ings. They then retired to the two cuartels, carrying their plunder, and there intrenched themselves, bidding defiance to the authori-ties of the State. The city remained in a state of alarm and terror for four days. Many families fled to the woods, and others barricaded their doors and kept guard night and day. General Wilches, president of the State, hastened from the capital, Socorro, more than sixty miles distant from Bucaramaga, with a small but well-dis force, attacked the robbers in their intrenched position and completely routed them. He killed several of the leaders and took many prisoners; the principal, Collazas, unfortunately escaping. Order was again re-stored. The names of the killed are Christian Geslkelz, Heaman Hederick and Abdulion Estevez; the wounded are Matias Muller, Fritzeh Schrader, the German consul and others. A Balloon Goes Up at San Francisc and Furnishes Tragic News Immediately.

SAN FRANCISCO, October 5 .- About halfpast three o'clock this afternoon Prof. Calgrove, aeronaut, and C. H. Williams, man ager of Woodward's gardens, attempted to make a balloon ascension from the gardens. The wind was blowing almost a gale, and the balloon seemed to be insufficiently inflated with gas and rose heavily above the buildings of the garden. Soon after it dropped and scudded along at a low eleva-tion, tearing away the telegraph wires in its flight. In a moment the bag became ripped and the gas escaped with a roar heard for blocks. Both of the occupants of the basket were thrown out, falling on Folsom street, between Fourteenth and Fifteenth, while the balloon came down a few rods beyond. A great crowd from the gardens and vicinity instantly collected and medical assistance Williams was fearfully mostly internal. Prof. Calgrove shortly died from the effect of his injuries. Prof. Martin, an aeronaut, and others who were pres-ent at the ascension, begged Mr. Williams not to go up, saying that in half the gale that was blowing he was literally taking his life in his hands. The men fell about two hundred feet, the balloon rebounding after striking the telegraph wires, then striking a chimney and again rebounding, at which moment the aeronauts were thrown out. The disaster has created considerable sensation, and many who frequent the gardens assert that the balloon was badly patched and unsafe at best, and express surprise at Mr. Williams risking an ascension, especially in

Pray can you tell, writes Olive Logan from London, who Madame de Canisy was before she became a focus for the eyes of po-litical Europe? She was born in Chicago— that we know. She is a beautiful woman that we know. She is a beautral woman—that any one can see. Tall, statuesque, classical, cold and intellectual, she has lifted herself into the mightiest power in the Napoleonic party. She was in England at the time of the prince imperial's funeral, I am told, though I myself did not catch a climpse of her politics. It was she glimpse of her noble outlines. It was she who instructed Prince Napoleon that he was dor's conundrum and its reply, "Who is the man most in love with Madame de Canisy? Her husband." But now I understand that the Princess Clotilde does not hesitate to say that the cause of her separation from her susband is Madame de Canisy. Naturally such reports form topics of conversation i high circles everywhere, and in the country houses of the rich and titled in England the name of the Chicago beauty is inseparably connected with all this tearful tragedy.

Abraham Johnson's Eventful Life of One Hundred and Six Years—His Indian Wife and Associations.

CHICAGO, October 6 .- The only news a the military headquarters is the following RAWLINGS, October 6 .- Nothing heard ye from Colonel Merritt's command. Expecting a courier at any moment. Information from citizen sources, which seems perfectly relia-ble, states that Pryor's command was seen three days since. Up to that date he had seen no Indians, and Captain Dodge's wagon occasion. One of them is a bayonet thrust below the knee, the other is a sword-cut on the neck. He says that after he was struck train escorted by a small detachment of col ored soldiers, reached Pryor's command, but the citirens did not learn where Dodge's company was.
